Item Number	LED Studio / Location Lighting	List Price (EUR)
DVS-LED600 	LED 600 The LED 600 uses 600 ultra bright 5400k LED's and has the equivalent output of an 860 watt tungsten light, but draws just 36 watts. The unit can be powered via the supplied 12v AC Adapter or via industry standard V-Mount type batteries using the built in battery adapter plate. The unit is also supplied with barn doors 3 x Colour Correction Filters/Diffuser and Carrying Case. The unit has a built in dimmer control and optional wired or wireless remote controls are available.	€ 575
DVS-LED900 	LED 900 The LED 900 is similar to the LED-600 above but uses 900 ultra bright 5400k LED's, with the equivalent output of a 1290 watt tungsten light but drawing only 54 watts. The unit is also designed with studio work more in mind, its modular design allows multiple panels to be combined to form larger panel arrays. Like the LED-600, the unit has a built in dimmer control and optional wired or wireless remote controls are available. Removable Barn doors and Carrying Case are available as also available as optional extras.	€ 695
DVS-LED900DMX	LED-900 with built in DMX Control. The unit retains built in manual dimmer control as well, but optional wired or wireless remote controls are not available for this model.	€ 735
DVS-LED1200 	LED 1200 The LED 1200 is a mains only LED light designed for Studio work. The unit uses 1200 ultra bright 5400k LED's, and has the equivalent output of a 1720 watt tungsten light. The LED-1200 modular design allows multiple panels to be combined to form larger panels or "walls of light". The unit has a built in dimmer control and optional wired or wireless remote controls are available. Removable Barn doors and Carrying Case are available as also available as optional extras.	€ 795
DVS-LED1200DMX	LED-1200with built in DMX Control. The unit retains built in manual dimmer control as well, but optional wired or wireless remote controls are not available for this model.	€ 845
