

Item Number	Carbon Coder	List Price (GBP)
RHO-CC	<p>Carbon Coder - The Essential High-Speed Transcoding Tool</p> <p>Carbon Coder is file-based transcoding software that facilitates the conversion of media to the largest array of acquisition, editing, broadcast, Web and mobile formats available. The system scales to precisely match initial requirements and grows to support an automated multi-node transcoding farm under the control of Carbon Server or Rhozet Workflow System (WFS). Carbon Coder also includes an open API that allows for the creation of custom workflows or 3rd party applications. As part of the transcode process, Carbon Coder handles a wide array of critical operations including SD/HD conversion, PAL/NTSC conversion, logo insertion, color space conversion, color correction, Close Captioning extraction and more. Carbon Coder provides high-performance, scalable and cost-effective transcoding for a broad range of business environments, from specialized studios to enterprise-scale installations.</p> <p>Note: It is compulsory to purchase an Annual Maintenance Contract for the first year</p>	£3,795
RHO-CCAPM	Carbon Coder Annual Maintenance (includes all software updates and technical support)	£570
RHO-DOLED NEW	Dolby E Decode (please ask for format support)	POA
RHO-DOLEE NEW	Dolby E Encode (please ask for format support)	POA
RHO-PS5000 NEW	<p>ProStream™ 5000 - File-Based Universal Transcoder</p> <p>The ProStream™ 5000 is a file-based universal transcoding device which converts between a wide variety of video formats. The ProStream 5000 is a 1-RU server with an unprecedented 16 processor cores, offering a very dense and powerful solution to any file-based transcoding problem. The ProStream 5000 can run as part of a multi-node, fully automated rendering farm. Harmonic's MediaPrism™ Workflow Manager system can also be used to manage the ProStream 5000 as part of a complete digital workflow solution for television, web, and mobile markets.</p> <p>Supporting all major formats, the ProStream 5000 is continually updated to accommodate new formats and technologies. The ProStream 5000 can run as a standalone appliance or as part of a multi-node, fully automated rendering farm. As part of the transcode process, the ProStream 5000 handles a wide array of critical operations including SD/HD conversion, PAL/NTSC conversion, logo insertion, color space conversion, color correction, closed captioning, ad insertion and more. Distributed enterprise-class transcoding with the ProStream 5000 provides maximum flexibility, futureproofing, and cross-vendor interoperability. The ProStream 5000 allows for automated processing of high volume transcoding tasks, managing job distribution, job prioritization, load balancing, FTP transfer, status monitoring, and job notification. The ProStream 5000 can be controlled remotely as well as programmatically using the fully-functional, XML-based, Carbon API.</p>	POA
Item Number	Carbon Coder - Educational Pricing	List Price (GBP)
RHO-ED-CC	Carbon Coder - Education	£3,415
RHO-ED-CCAM	Carbon Coder - Education Annual Maintenance (1st year must be purchased)	£515
Item Number	Carbon Server	List Price (GBP)
RHO-CS	<p>Carbon Server Workgroup Transcoding – Small to Medium Farms</p> <p>Multiple Carbon Coder nodes can be configured as a transcoding farm, controlled by one or more Carbon Servers. Carbon Server allows for automated processing of high-volume transcoding tasks, server-controlled failover of Carbon Coder nodes, as well as managing job distribution, job prioritization, load balancing, FTP transfer, status monitoring, and job notification.</p> <p>Interaction with the server software is through an administrative application that runs on the Carbon Server machine, or via an XML-based API that is included with the product. The same API controls both Carbon Coder and Carbon Server. A web interface that can be accessed from remote machines is also available.</p> <p>Carbon Server is well suited for simple transcoding managing a couple of Carbon Coder nodes. For more complex transcoding environments requiring; high volume, tighter 3rd party integration or sophisticated workflows, we recommend the Rhozet Workflow System (WFS).</p> <p>Note: It is compulsory to purchase an Annual Maintenance Contract for the first year</p>	£9,495
RHO-CSAM	Carbon Server Annual Maintenance (includes all software updates and technical support)	£1,425
Item Number	Workflow System	List Price (GBP)
RHO-WFS	<p>Rhozet Workflow System</p> <p>The Rhozet Workflow System (WFS) is an open and extensible task-based engine ideal for managing video centric workflows. Rhozet WFS enables control of multiple Carbon Coder nodes configured as a transcoding farm. The distributed nature of WFS allows for automated processing of high-volume transcoding tasks, failover support, managing job distribution, job prioritization, load balancing, FTP transfer, status monitoring, and job notification.</p> <p>With an extensive API, Rhozet WFS can manage the complete video asset transformation process by integrating additional 3rd Party and Harmonic processing nodes. With the integration of Rhozet Quality Control System (QCS), our automated quality control engine, customers can add automated and scalable video verification processes to their transcoding farm. Rhozet WFS enables enterprise transcoding solutions with maximum flexibility, scalability and cross-vendor interoperability.</p> <p>Note: It is compulsory to purchase an Annual Maintenance Contract for the first year</p>	£12,750
RHO-WFSAM	Workflow System Annual Maintenance (includes all software updates and technical support)	£1,915
RHO-WFSA NEW	Workflow System Appliance - information on request	POA
Item Number	Quality Control System	List Price (GBP)
RHO-QCS	<p>Rhozet Quality Control System (Requires Rhozet WFS)</p> <p>The Rhozet Quality Control System (QCS), our automated quality control engine, allows customers to add automated and scalable video verification processes to their transcoding farm. QCS analyzes each and every file to help identify possibly problematic files both before and after the transcode process. This leads to a much more efficient QC process for file-based workflows by focusing the task down to only files with potential problems.</p> <p>As an add on to Rhozet Workflow System (WFS) and Carbon Coder, QCS is embedded into the transcoding workflow providing the most efficient and scalable method for assessment and verification of video assets by monitoring every step in the workflow. Rhozet WFS enables enterprise transcoding solutions with maximum flexibility, scalability and cross-vendor interoperability.</p> <p>Note: It is compulsory to purchase an Annual Maintenance Contract for the first year</p>	£3,795
RHO-QCSAM	Quality Control System Annual Maintenance (includes all software updates and technical support)	£570
Item Number	HP Turnkey Solutions	List Price (GBP)
	<p> HOLDAN Limited are a HP OEM Partner and as such can provide Turnkey Transcoding Systems built on tried and trusted HP technology</p> <p>Please see our separate HP Turnkey Price List for further details</p>
